

Dr. Friedrich Fuchs MD, FESC

Senior Medical Officer Cardiovascular Care

Siemens Healthineers

APPLICATION TO ESC Industry Roundtable Nucleus

Having represented Siemens Healthineers over the last years within the ESC Industry Roundtable including co-chairing some meetings, I always have enjoyed the inspiring discussions and the open atmosphere within this format. What is still impressing me most is that all participants are really openly cooperating and eager to jointly improve management and outcomes of people with cardiovascular diseases.

Having said this, I would be happy to engage more deeply into the ESC Industry Roundtable and its activities.

Being a board-certified cardiologist, I know from my clinical career that cooperation is the critical success factor for efficient care delivery. If elected, I would be happy to actively contribute to the future development of the ESC Industry Roundtable as a joint effort of care givers and industry to improve cardiovascular health.

I would be happy finding your support.

Friedrich Fuchs
